

The Benefits

- **Ovilac is easy to mix in both warm and cold water**
It is suitable for use in warm bottle feeding and cold ad-lib feeding systems
- **Concentrated milk protein**
Highly digestible for faster growth
- **Ultra filtrated milk protein**
Natural health protection with less risk of nutritional upsets
- **Fully formulated**
Provides all the nutrients required by the lamb
- **Stays fresh for 24 hours**
Excellent in ad-lib systems
- **Available** in 5kg, 10kg and 25kg bags
- **Mixing Rate**
200 grams of Ovilac mixed with water to make 1 litre of mixed milk
- Outstanding growth rates proven in performance trials.

Mixing

200 grams of Ovilac mixed with water to make 1 litre of mixed milk (4oz made up to 1 pint of mixed milk). Add Ovilac to one third of the required volume of warm or cold water and mix thoroughly. Top up with fresh warm or cold water to give final dilution indicated below and whisk lightly.

Feeding Systems

Cold Ad Lib Feeding System

Ad lib cold milk feeding requires less labour yet gives maximum lamb growth. By using the Volac Minisuckler, cold milk is supplied to a group of lambs via teats from a milk reservoir. Suckling small quantities of milk at frequent intervals gives high digestibility and reduces the risk of digestive problems. It is essential to mix and feed the milk cold as this will reduce the risk of lambs gorging and enhance the keeping quality of the mixed milk.

No. of Feeds per day	Maximum Intake per day	Comments
at least 4	1 litre/2 pints	Restricted feeding, one teat per lamb
2-4	1 litre/2 pints	
ad lib	ad lib cold milk	Cold ad lib feeding, three lambs per teat. Concentrate feed should be available from end of first week

Warm Bottle Feeding (Restricted) System

For traditional bottle feeding of lambs, Ovilac should be mixed and fed warm at 39°C/102°F. Ensure that all feeding equipment is thoroughly tested and disinfected between feeds.

No. of Feeds per day	Maximum Intake per day	Comments
at least 4	1 litre/2 pints	One teat per lamb throughout feeding period
4	1 litre/2 pints	
2-4	1.5 litre/ 2.5 pints	Concentrate feed should be available from end of first week
